Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/17/08 has been entered.
2. The applicant's argument regarding the 35 U.S.C. 112, first paragraph, rejections are found persuasive and the rejections have been withdrawn. The examiner agrees that Fig. 12 of the application shows that the pad has a portion that is narrower than the distal portion of the pad. However, a new grounds of rejection is provided for the claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 14-21 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,390,019 to LeVeen et al.

LeVeen discloses surgical clip capable for use in holding a suture, comprising: a housing (the u-shaped portion of the clamp) having an outer surface; a first jaw 13

connected to the housing and having a first planar surface extending from the outer surface of the housing along the first jaw, the first jaw having a proximal end proximate the housing and a distal end away from the housing; a second jaw **12** connected to the housing in an opposing relationship to the first jaw and having a second planar surface facing towards the first planar surface, the second jaw having a proximal end proximate the housing and a distal end away from the housing; a rib extending out from the second planar surface (see attached figure below), proximate the proximal end of the second jaw, towards the first planar surface; and a pad **8** attached to the second planar surface having a first portion extending from the rib distally along the second planar surface and a second portion extending from the outer surface of the housing adjacent to the rib to the first portion of the pad, the second portion of the pad having a width smaller than a width of the first portion of the pad; wherein the clip further comprises a second rib; wherein the first jaw also has similar rib arrangement; wherein the pads from first and second jaw abuts the outer surface of the housing; and wherein the outer surface of the housing and the second portion define a cavity (see Fig. 4).

Response to Arguments

5. Applicant's arguments with respect to claims 14-21 have been considered but are moot in view of the new ground(s) of rejection.
